Australian-based support team

FAULTS HAPPEN. WE'VE GOT YOU COVERED.

There are many reasons why a solar system could experience problems.

In the event of a problem, you can rely on Solar Analytics Monitoring to quickly and accurately detect developing faults, failures or under-performance.

Keeping your solar system performing at its best will give you the most value.

THE ENERGY WORLD IS CHANGING

Batteries, electric vehicles and energy trading are all part of the future of energy. It's coming sooner than you might think.

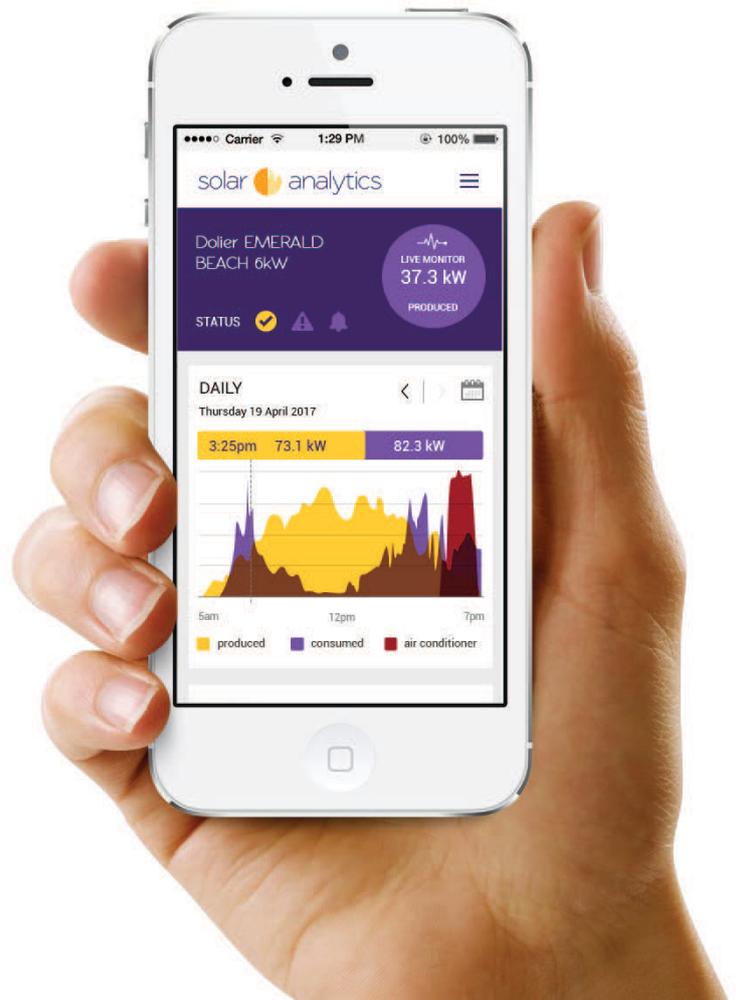

The way we interact with energy will be markedly different. Solar Analytics Monitoring will give you the tools to manage the coming changes.

PRODUCE MORE, USE LESS, SAVE MONEY.

With Solar Analytics Monitoring, you can optimise your home energy consumption to align with your available solar.

Knowing how much free energy from the sun you're using every day translates into real dollar savings.

How else will you know if you're getting the most out of your solar?

“Love the system. I bought all these extra gadgets to see what was happening with my solar and power. Solar Analytics does it all.”

- Peter, NSW

“Great system information. Increased our production by 20%.”

- Bill, SA

THE MISSION OF SOLAR ANALYTICS

Solar Analytics is an Australian software company founded by solar industry veterans, data scientists, developers and passionate PV experts.

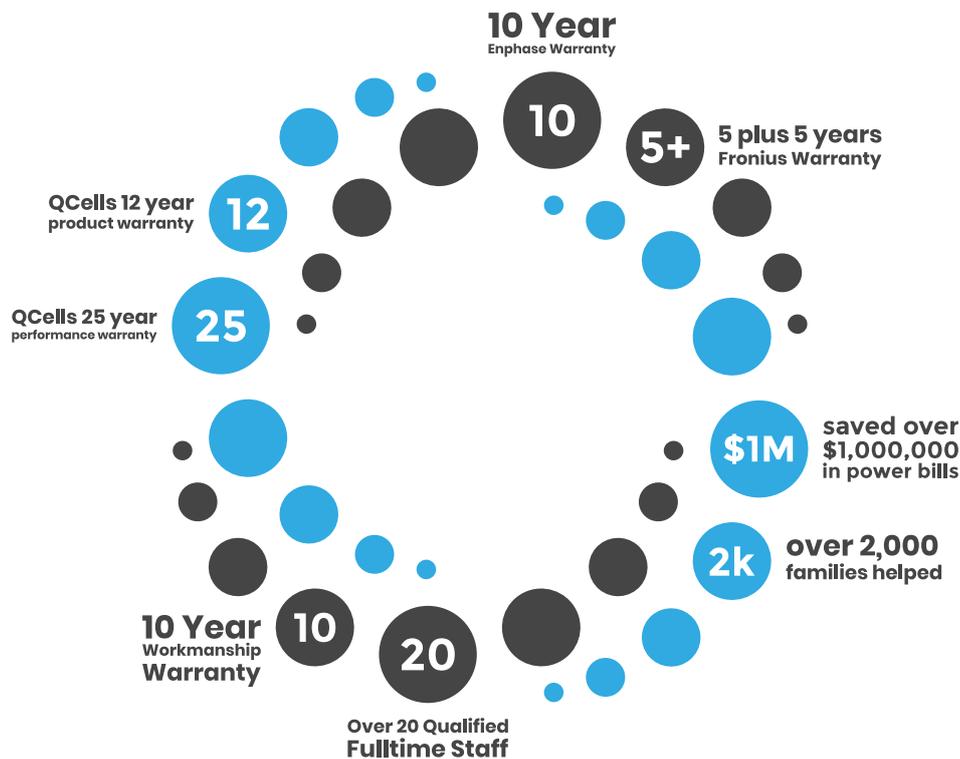

We design, develop and supply intelligent solar and energy monitoring solutions.

Our mission is to empower people to navigate the changing energy lanscape.

The PSC Difference

The Numbers Stack Up

In-house Installation Team

This means no 'paid-by-the-panel' subcontractors. On site, our dedicated team will run you through your install to ensure you know what's happening every step of the way.

Keeping an Eye on Things

To help you keep an eye on things, we have teamed up with Solar Analytics to offer a monitoring system that gives you the ability to see exactly what your system is producing as well as what your house is consuming, in real-time. This means you can reduce your energy bill even further by utilising your own home-grown energy.

After Sales Service

Our full time in-house service crew are at your disposal. This reduces your downtime in the event of a fault and ensures that your system is always operating at top performance.

Support

Our customer-loving team at Penrith Solar Centre are dedicated to answering all of your questions and keeping you in the loop when it comes to anything from grid applications to follow ups.

TESTIMONIALS

○ Llewelyn Chukwok

Jordan Springs

"The experience for our PV install from Jake and his team at Penrith Solar Centre was exceptional.

From the initial enquiry through to post-install was above what I had expected from previous enquiries to other PV suppliers.

The key difference and deal breaker was that Jake sold and installed the solutions that he sold. We were more confident with the quality of work that the installers would do, especially when you can't see what they are doing on your roof.

The customer service was great, Jake took the time to come out to site, discuss and understand what we wanted and then recommended the best solution.

I'd have no hesitation in recommending Jake and Penrith Solar Centre to anyone looking for a solar solution, where the people you meet with are genuinely interested in your needs - not just what the total sale will be."

○ Wayne Vandine

Mulgoa Rise

"After spending countless hours researching solar PV systems and becoming a lot more knowledgeable in the process, I decided it was time to have solar installed. I had heard about Penrith Solar and decided to call and arrange a meeting to discuss everything solar. After meeting up with Jake and spending a good hour discussing my goals, going over power bills and what I wanted to achieve, I walked away knowing this was the company I wanted to install my system.

They were very professional, answered everything I wanted to know and I just knew "had that gut feeling" that Jake and his company were not going to disappoint. I gave Jake and his team a time frame to have the job done and true to Jake's word, it was delivered and installed on time. Jake and the guys at Penrith Solar have done a fantastic job installing and commissioning the system and their after sales service is second to none. I highly recommend this company to anyone looking to have Solar installed, not only will they do a fantastic job, they keep you informed along the way.

PS: My first bill since having solar installed went from \$752 to be in credit of \$25 towards my next bill. This was a 90 day billing cycle and my Solar was up and running for just 69 of those days."

TESTIMONIALS

○ John & Carrol Sparks

Bligh Park

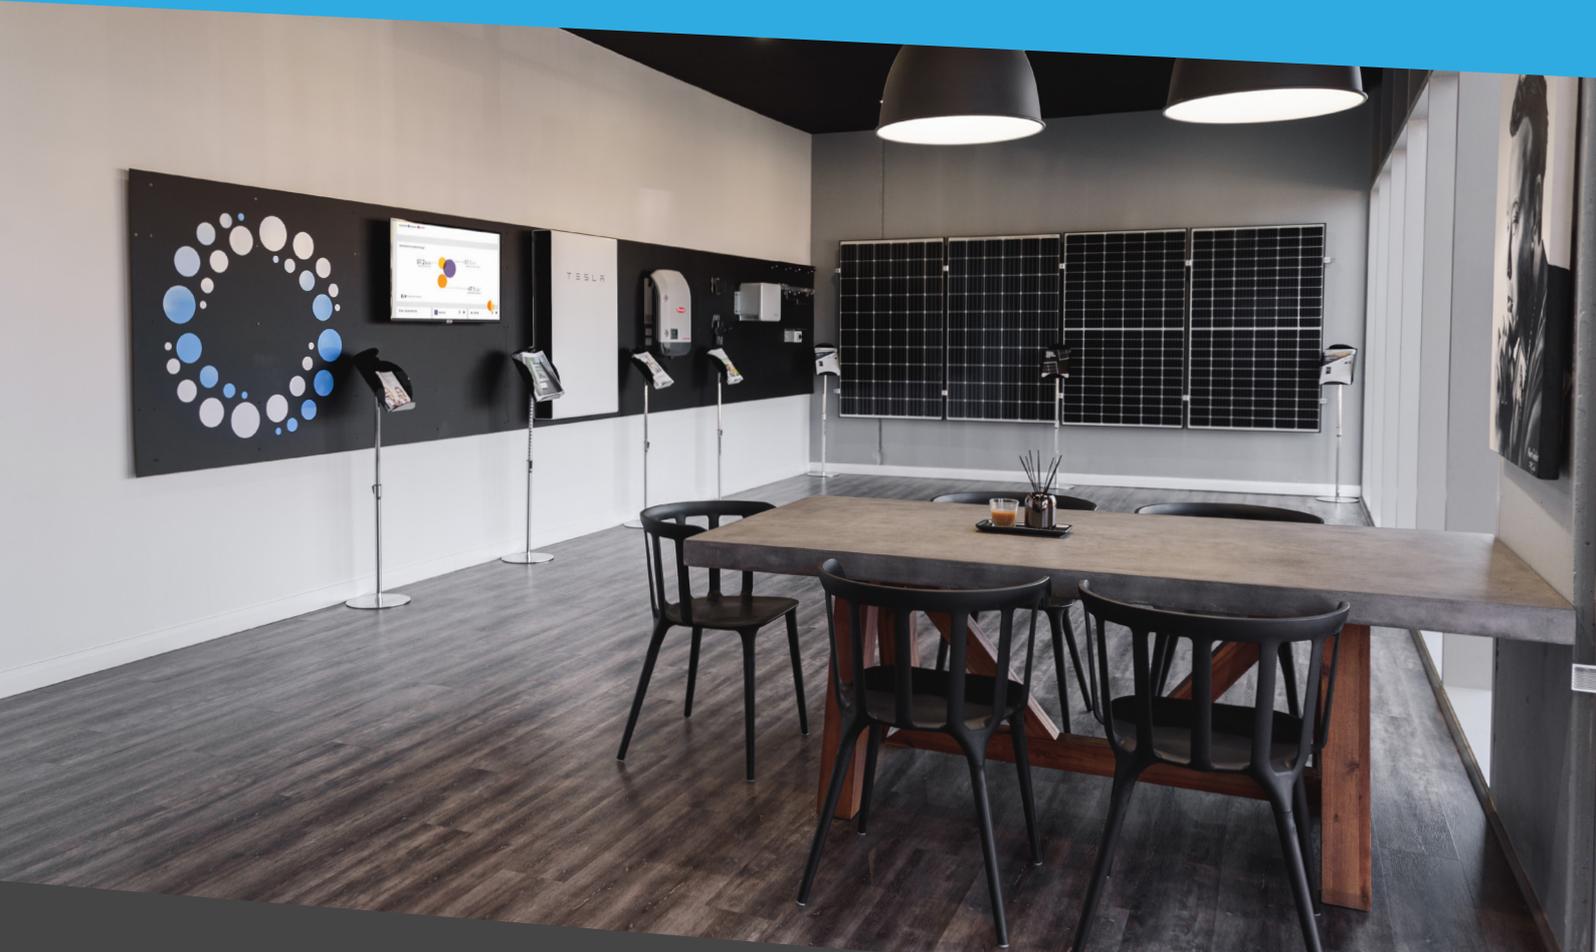

"To our amazement we met a company that actually cared for what they were doing as well as the customer needs. Jake Warner, the Managing Director showed absolute enthusiasm and first rate product knowledge, not only describing the differences in the equipment he was offering but great technical knowledge that was relayed to us in laymen terms, this was also the very first occasion that we actually got to see the pieces of equipment on offer.

This was followed by a site visit and then a written quotation which we accepted.

The installation was carried out to the very highest standard and we also elected WITHOUT any pressure to upgrade our switchboard as an extra. WOW, what an incredibly satisfying experience. The system is already, in winter creating an average of 25kWh per day.

I recommend that you visit Penrith Solar Centre and make your own assessment and remove some of the used car sales experience from solar installation."
